

OUR PHILOSOPHY

The provision of support services is based on the following beliefs:

- ◆ Each individual is a unique adult and is deserving of respect and dignity.
- ◆ Support should be flexible, individualized and reflective of the participants' choices, abilities and existing support services.
- ◆ Choice often involves some elements of risk. Where possible, individuals will be permitted to experience the result of their choices to the extent that they are able.
- ◆ Independence is a dynamic process of accessing people and services as challenges and successes change.

We rigorously promote the rights of the individual and promote recognition of acquired brain injury and how it affects individuals and families through ongoing advocacy and public education.
